WORK EXPERIENCE

Opland Technologies

May 2025 – June 2025

Sr. Software Engineer & Tech Lead

Remote

- Leading the end-to-end development of a modern Inventory ERP system inspired by Focus9 and Odoo, managing a team of 5 junior developers and overseeing architecture, code quality, and feature delivery.
- Architecting a modular, scalable frontend using React, Redux Toolkit, and MUI with key modules like procurement, stock, sales, and reporting.
- Building a client-specific HRMS product tailored for enterprise workflows with employee management, payroll, attendance, and leave tracking features.

Headstarter AI

June 2024 – April 2025

Freelance FullStack AI Developer

Remote

- Developed AI-powered modules using TypeScript and Next.js, improving algorithmic performance by 20%.
- Designed and deployed machine learning models for data predictions, reducing manual data analysis time by 40%.
- Conducted comprehensive testing and debugging to ensure robust application performance and reliability, achieving a 95% uptime rate.

Hootboard

March 2023 – March 2024

Software Engineer

Philadelphia, United States

- Redesigned the React.js-based onboarding process, reducing user drop-off rates by 35% and increasing user sign-ups by 20% within three months.
- Built a React.js admin interface to streamline kiosk setup, reducing setup time by 50% and improving efficiency across 1,500 kiosks in the United States.
- Engineered a scalable kiosk OS deployment pipeline, automating updates and reducing deployment time by 40%, ensuring seamless rollouts for over 2,000 devices.
- Developed an ISO build process for kiosk OS deployment, enabling plug-and-play configuration for new devices, reducing onboarding time by 60%.
- Collaborated with backend and platform engineering teams to enhance API performance, reducing data retrieval latency by 25% and improving response times for key user actions.
- Integrated analytics tools to track user behavior, providing actionable insights that increased customer satisfaction scores by 15%.

AltCampus

Sept. 2021 – Jan. 2023

FullStack Developer

Himachal Pradesh, India

- Built and maintained learner-facing UI and internal dashboards for an EdTech platform using Next.js.
- Developed and optimized backend APIs with Next.js and MongoDB, improving app performance and maintainability.
- Integrated modern tooling for CI/CD, logging, and error tracking to enhance platform reliability.

OPEN SOURCE CONTRIBUTIONS

Go Cheatsheet – I/O, Testing, JSON, and Web Server Guide

Pull Request #650, Merged: April 2025, [Live Demo](#)

- Expanded the Go cheatsheet with tutorials on file I/O, unit testing, JSON encoding/decoding, and building HTTP servers with `net/http`, `mux`, and `chi`.
- Organized and documented examples to support backend developers and Go learners.

Svelte Cheatsheet – Full Cheatsheet Contribution

Pull Request #648, Merged: April 2025, [Live Demo](#)

- Authored and contributed a structured cheatsheet for Svelte, covering core syntax, reactivity (`$:`), component patterns, slot usage, and store implementations.
- Enhanced documentation accessibility for developers transitioning to or learning Svelte.

Meme Dictionary – TikTok Brainrot Slang Contribution

Pull Request #29, Merged: April 2025, [Live Demo](#)

- Contributed a curated collection of viral TikTok brainrot phrases and Gen Z meme slang, expanding the dictionary's cultural depth and relatability.
- Submitted feature branch `feature/add-brainrot-words`; 2 commits successfully merged into `main` by The-CodingSloth.

React Cheatsheet – Refs Section Bug Fix

Pull Request #647, Merged: April 2025, [Live Demo](#)

- Resolved duplication and layout issues in the “Refs” section of the React cheatsheet.
- Improved UI consistency and fixed missing or misaligned explanatory text.

React Cheatsheet – Hooks Section Enhancement

Pull Request #508, Merged: March 2024, [Live Demo](#)

- Added a comprehensive section on React Hooks, including `useState`, `useEffect`, multiple state variables, and custom hook creation.
- Provided well-documented examples to improve learning and usability for new developers.

PUBLICATIONS

Mastering SOLID Principles in JavaScript

October 2024

- Explained how SOLID principles improve maintainability in JavaScript applications.
- Published on Medium: [Read Article](#)

Using displayName in React: Simplifying Debugging

September 2024

- A concise guide to improving component traceability in React apps using ‘displayName’.
- Published on Medium: [Read Article](#)

PROJECTS

Conduit (Medium Clone)

July 2022 – December 2022

- Developed a full-stack web application using React.js, Node.js, Express.js, and MongoDB.
- Implemented CRUD operations for a blogging platform with user authentication, posts, likes, and comments.
- GitHub Repository: github.com/zehan12/conduit-react | Live Demo: conduit-realworld-example-app.fly.dev

Eyewear Ecommerce Application

August 2019 – October 2022

- Constructed RESTful API and React frontend to deliver full e-commerce functionality.
- Integrated PostgreSQL database and user authentication for robust data management.
- Enhanced user experience with seamless shopping cart and checkout systems.
- [Github Repository](#) | [Live Demo](#)

EDUCATION

Mohanlal Sukhaipuradia University

2018 – 2021

Bachelor's Degree

Udaipur, Rajasthan

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Golang, Ruby, Python, Node.js, Java, SQL, Bash

Frameworks: React.js, Hono.js, Express.js, Gin, Fiber, Vue, Next.js, Ruby on Rails, React Native, Nest.js, Remix

Developer Tools: Git, Docker, NPM, yarn, pnpm, turbo pack, Maven/Gradle

Databases: MongoDB, PostgreSQL, MySQL, Firebase, Supabase, Redis

Libraries: Redux, React Router, Redux Saga, React Query, Tailwind, Prisma, Shadcn UI

Expertise: Data Structures, Algorithms, Object-Oriented Programming (OOP)
